THIS MONTH HIGHLIGHT

## TEST PERFORMANCE

MATERIAL & PRODUCT TEST

**Polyware** stands tall when it comes to product quality. All our HDPE (polyethylene) virgin materials are certified by PE100+. The materials will undergo strict raw material lab tests to verify for production. The first batch of each output then goes for several tests before the final output.

### MATERIAL TEST

Our material testing lab is equipped with various state-of-the-art machinery and equipment. All our products are tested for conformance with existing piping specifications and compliance with international standard.

### PRODUCT TEST

We maintain our product compliance with international performance standard such as ISO 9001, SIRIM, IKRAM, SPAN, and all others related certification body.

### CERTIFICATE APPROVED BY

## PREMIUM TRIP CUSTOMER VISITATION

**Grateful to NCC Solutions for bringing their customer to visit us**

A warm thank you to NCC Solutions for facilitating a remarkable industry meet with their valued customer. Our Electro Fusion & Buff Fusion installations aim to safeguard Non Revenue Water (NRW), and we were delighted to showcase our expertise. Collaboration and knowledge sharing are the keys to progress, and we're honored to be part of this journey with NCC Solutions.
