# NEWSLETTER ABOUT Polyware®

Polyware® was incorporate in Ipoh, Malaysia since 1996. The company was started by a group of entrepreneurs, engineers, mould makers and production personnel who came together and shared their respective expertise and experiences. Polyware manufactures more than 1000 types of PE pipe fittings ranging from mechanical type, electro fusion, butt fusion and socket fusion which are used in water utilities, biogas, mining, industry application and high-end irrigation distribution.

1,500,000,000 joint delivered worldwide

3,500 fusion joints testing performed for 1,000 hours

2,000,000 mechanical joints testing performed

At least 2,000 cases involve in worldwide water supply subject

## APPLICATION BEST PRACTICE (TRAINING)

We are thrilled to be introduced by NCC Solutions to PETRONAS, where we have been invited to provide Electro Fusion & Butt Fusion Installation (Application Best Practice) training to their talented contractors who are eager to enhance their skills and knowledge. Contractors practice new skills through hands-on learning and practical experience.

The main objective is to have site experience throughout the water supply projects to ensure that the whole installation performance is correct and safe. As a manufacturer, it is important to safeguard the entire installation process, and we have been providing at least 1,500 training hours to qualified contractors and installers over the past few years. Before concludes the training, we awarded certificates to the successful participants.
